Home - Make Architectural Metalworking

An architectural decision captures the result of a conscious, often collaborative option selection process and provides design rationale for the decision making outcome, e.g., by referencing one or more of the quality attributes addressed by the architectural decision and answering "why" questions about the design and option selection. Architectural decisions concern a software system as a whole, or one or more of the core components of such a system.

Architectural decision - Wikipedia

Making Architecture, then, serves as both a record of the building process and a visual commentary on the drama of the architecture.

Making Architecture: The Getty Center

The ancient craft of architectural model making may seem unnecessary in today's age of digital renderings and virtual tours, but physical models remain a uniquely revealing and compelling tool for the architect. More forcefully than any other way of visualizing a building, models represent ideas, as opposed to images.
