I have just finished reading «Mathematics – form and function» by Saunders Mac Lane. The main goal of the book is to present the author's philosophy of mathematics, answering the question «what is mathematics?». In doing so, he also answers the question «is mathematics true?» and demonstrates that it is a non-question.

CiteSeerX - Document Details (Isaac Councill, Lee Giles, Pradeep Teregowda): several intentions. It could be taken as an account written by a professional mathematician to apprise the man-in-the-street of the nature of mathematics. Since I have no insight into what such a person might require, I shall instead restrict my review to considering this book solely as a contribution to
