screen.availHeight just gives the available height in the browser window while screen.height gives the exact height of the screen. - apnerve Sep 22 '15 at 18:22 This returns the dpi scaled resolution, not the native screen resolution.

### How to detect the screen resolution with JavaScript ...

This is your monitor's native resolution—usually the highest resolution your monitor can support. Tap or click Apply . Monitors can support resolutions that are lower than their native resolutions, but text won't look as sharp and the display might be small, centered on the screen, edged with black, or stretched.

### Get the best display on your monitor

Set Resolution & Scaling. When you connect your 4K display to your system, it will not automatically change the screen's resolution. You have to do this manually. Open the Settings app and go to the System group of settings. Select the Display tab. If you have multiple monitors, select the one that is your 4K monitor before proceeding.

### How To Set Up A 4K Monitor On Windows 10

Today I tried adding the third display with 1280x1024 resolution connected to VGA of the dock. It doesn't work. The third display gets detected by the Ubuntu display settings, but it can't be turned on. It works only if I unplug U3011. It is also possible to run all 3 displays in mirror mode, but not in extended desktop mode.
